YOGESH CHHABRA

Linux Administrator | System Administrator

yogeshchhabra316@gmail.com| Tel:+919588114408| linkedin.com/in/yoghchhabra | Palwal, Haryana

PROFILE SUMMARY

Results-driven Linux Administrator with 3+ years of experience managing enterprise Linux infrastructure, cloud environments, and production support operations. Expertise in Red Hat Enterprise Linux (RHEL 7/8/9), AWS Cloud Services, Docker containerization, infrastructure monitoring, DNS administration, and configuration management. Proven track record in server provisioning, patch management, infrastructure automation, disaster recovery support, performance tuning, and troubleshooting mission-critical systems supporting 100+ production servers. Skilled in implementing secure, highly available, and scalable infrastructure solutions while ensuring operational excellence and business continuity.

PROFESSIONAL EXPERIENCE

Linux Administrator — Power Grid Corporation of India Ltd. (Deployed through IT Cons & GA Digital Web Pvt. Ltd.)
June 2023 – Present

Key Responsibilities & Achievements

- Administer and maintain **100+** RHEL 7/8/9 production Linux servers.
- Perform Linux server provisioning, configuration, **patch management**, and lifecycle administration using **Red Hat Satellite**.
- Monitor critical infrastructure using **Zabbix**, proactively resolving incidents to maintain service availability.
- Perform monthly security patching, kernel updates, and package upgrades on RHEL 7/8/9 and Ubuntu production servers using **YUM, DNF, and APT**.
- Manage DNS infrastructure using **BIND**.
- Perform RHEL 7 to RHEL 8 migration activities using **Leapp**.
- Configure and maintain **Apache Web Server, Chrony, and ownCloud**, and related infrastructure services.
- Manage storage administration through **LVM**, including logical volume creation, expansion, and optimization.
- Perform log analysis using /var/log, journalctl, and other Linux utilities to troubleshoot production incidents.
- Troubleshoot CPU, memory, disk, and performance issues using Linux utilities.
- Perform user administration, permission management, filesystem management, and **server hardening**.
- Execute GitLab version upgrades, backup validation, rollback planning, and post-upgrade verification.

KEY PROJECTS

Postfix SMTP Relay Server Migration & Configuration (RHEL 9)

- Configured and deployed a Postfix SMTP relay server on RHEL 9.
- Integrated Postfix with the Microsoft 365 connector using certificate-based authentication.
- Troubleshot and resolved mail routing, relay loop, and SMTP authentication issues.
- Validated internal and external email delivery and performed mail queue monitoring and testing.
- Implemented secure mail flow using TLS and certificate-based relay communication.

Docker Web Server Deployment

- Deployed and managed containerized Nginx web servers using Docker.
- Managed Docker images, container networking, and log monitoring to support a lightweight and scalable web infrastructure.

EDUCATION

Master of Computer Applications (MCA) — DITMR
2021 – 2023

Bachelor of Computer Applications (BCA) — DAV Centenary College
2016 – 2019

TECHNICAL SKILLS

- **Operating Systems:** RHEL 7/8/9, CentOS, Ubuntu, Active Directory
- **Cloud:** AWS (EC2, IAM, S3, Security Groups, Elastic IP, CloudWatch)
- **Automation:** Ansible, Shell Scripting, Cron Jobs
- **Package Management:** YUM, DNF, APT, RPM
- **Red Hat Tools:** Red Hat Satellite, Subscription Management, Content Views, Lifecycle Environment
- **Monitoring & Security Tools:** Zabbix Monitoring, Fortinet FortiAnalyzer (Firewall)
- **Networking:** nmcli, nmtui, DNS, PuTTY
- **Mail Services:** SMTP, Postfix, Mail Relay | **Containerization:** Docker
